

ANTI-STATIC TILES

Anti-static tiles are designed to control static electricity in environments where electrostatic discharge could be a concern. These specialized tiles, often used in areas like data centers and laboratories, help prevent damage to sensitive electronic equipment by providing a controlled path for static electricity to dissipate.

Name	Anti Static Conductive Blue Dk Tile
Price	19.99
Material	anti static, glazed vetrified
Size	600x600mm
Color	Blue dk

Name	EHM Stacked Stone Charcoal Grey
